

Focusing Evaluation Design

Seattle Indian Health Board
Urban Indian Health Institute

Julie Loughran, MPH
Project Coordinator

Objectives of session

- Overview evaluation framework and uses of evaluation
- Review logic models
- Introduce two types of evaluation
- Examine what makes a good evaluation question
- Discuss the identification of indicators

Urban Indian Health Institute, a Division of the Seattle Indian Health Board

Evaluation

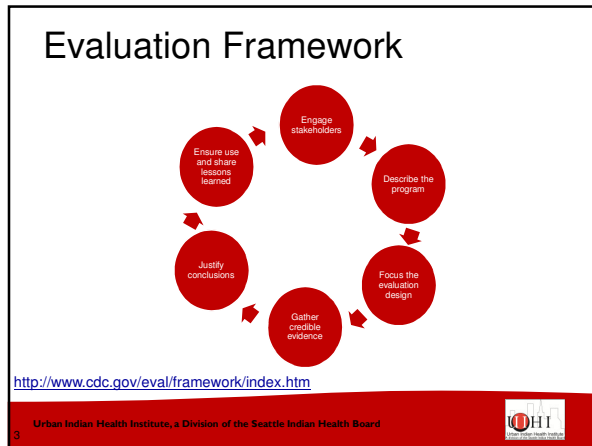

A systematic way of collecting information about the characteristics, activities, products, and outcomes of a program.

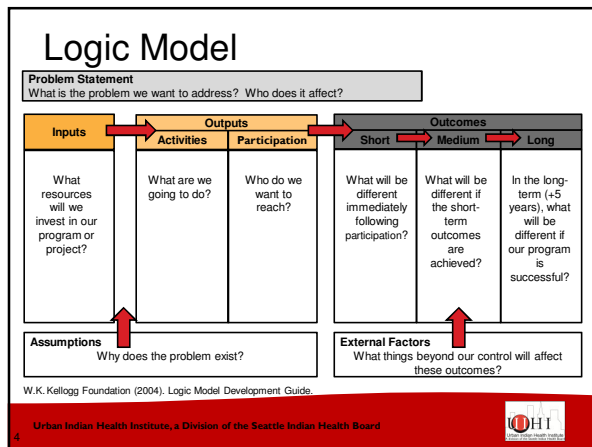

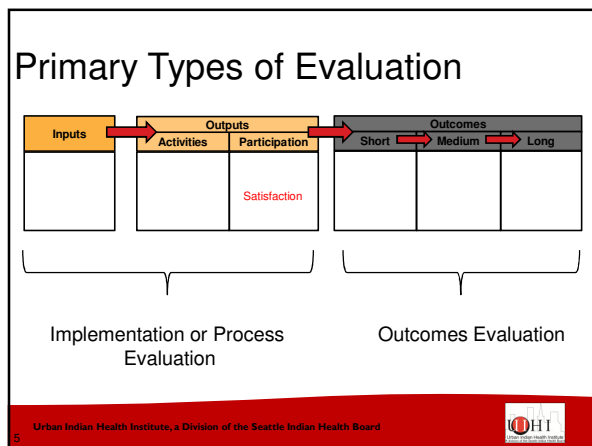

Patton, M.Q. (2008) Utilization-focused evaluation (4th edition). Thousand Oaks, CA: Sage.

Urban Indian Health Institute, a Division of the Seattle Indian Health Board

Evaluation Considerations

- Age of the program
- Funding and budget
- Logistics
- Knowledge and values
- Consensus
- Influence

Ask the most critical questions as well as those about equity and disparities, like "For what groups does [this program] work?"

Grembowksi D. *The Practice of Health Program Evaluation*. Thousand Oaks, CA: Sage Publications, Inc.: 2001.

Urban Indian Health Institute, a Division of the Seattle Indian Health Board

6

Implementation (Process) Evaluation

VS

Examining core activities to determine what took place and make improvements

Urban Indian Health Institute, a Division of the Seattle Indian Health Board

7

Implementation (Process) Evaluation Questions

- What are the critical components/activities of this project (both explicit and implicit) that allow for participation?
- What aspects of the implementation process are facilitating success for the project?

Urban Indian Health Institute, a Division of the Seattle Indian Health Board

8

Why conduct an Implementation (Process) Evaluation

Ongoing feedback

- Strengths
- Barriers
- Meeting need
- Resources
- Staff performance and perceptions
- Community perceptions
- Staff and client interactions
- Quality of services
- Systemic change
- Experiences and satisfaction

Urban Indian Health Institute, a Division of the Seattle Indian Health Board

9

Outcome Evaluation

Assesses the short- and long-term **results** of a project and seeks to measure the **changes brought about** by the project

Urban Indian Health Institute, a Division of the Seattle Indian Health Board

10

Why Conduct an Outcome Evaluation

Urban Indian Health Institute, a Division of the Seattle Indian Health Board

11

“What we see depends mainly on what we look for” – Sir John Lubbock

Urban Indian Health Institute, a Division of the Seattle Indian Health Board

12

Getting Started on Evaluation Questions

We are conducting an
evaluation of _____
because _____
in order _____
to _____.

Urban Indian Health Institute, a Division of the Seattle Indian Health Board

13

Where Do Evaluation Questions Come From?

Who	What do you/they want to know?	How will they use the information?
You/staff	How long does it take to complete client assessments and associated forms?	Improve workflow
Participants	•Is it convenient to participate? •What do I get out of participating?	•Deciding whether to participate or at what level to participate •Deciding whether to champion the program in the community
Funder	•How many people are being seen? •What percentage of those seen are showing improvements in depressive symptomatology?	Decide if funding should be continued
Other stakeholders	•What does the program do? •How does it ensure that it meets the needs of my community?	Deciding if they want to advocate for the program in a policy environment

Urban Indian Health Institute, a Division of the Seattle Indian Health Board

14

What Makes a Good Evaluation Question?

Appropriate and relevant + Answerable + Reasonable to collect evidence = Good Evaluation Question

~~Is our depression support group increasing the state reimbursement rates for mental health services?~~

How has clients' perception of the emotional and social support they have changed over the course of their participation in the program?

Urban Indian Health Institute, a Division of the Seattle Indian Health Board

15

What Makes a Good Evaluation Question?

Appropriate and relevant + Answerable + Reasonable to collect evidence = Good Evaluation Question

~~Are program participants doing better than before?~~

Compared to the beginning of the program, how have participants' depressive symptoms changed?

Urban Indian Health Institute, a Division of the Seattle Indian Health Board

16

What Makes a Good Evaluation Question?

Appropriate and relevant + Answerable + Reasonable to collect evidence = Good Evaluation Question

~~Does exposure to physical violence cause depression?~~

At the end of program participation, how does the implementation of stress coping skills differ between participants with a history of exposure to violence and those without a history of exposure to violence?

Urban Indian Health Institute, a Division of the Seattle Indian Health Board

17

What Makes a Good Evaluation Question?

Appropriate and relevant + Answerable + Reasonable to collect evidence = Good Evaluation Question

Urban Indian Health Institute, a Division of the Seattle Indian Health Board

18

Translating Objectives into Questions

S • **Specific:** What exactly do we want to accomplish?

M • **Measureable:** How will we demonstrate the extent to which this objective was accomplished?

A • **Attainable:** Is it realistic that this objective can be carried out?

R • **Relevant:** How does this objective tie into the goals?

T • **Time bound:** By when will this happen? How often will it happen?

Urban Indian Health Institute, a Division of the Seattle Indian Health Board

19

Translating Objectives into Questions

Output Objective
Facilitate 12 depression self-management workshops using culturally adapted version of evidence-based curriculum during the first year of the program.

Evaluation questions
What changes were made to the evidence-based curriculum to make it culturally appropriate? How do these changes affect the implementation of the curriculum?

Urban Indian Health Institute, a Division of the Seattle Indian Health Board

20

Translating Objectives into Questions

Outcome Objective

After participating in three or more sessions, 60% of attendees will report implementing two steps they took to self-manage their depression symptoms.

Evaluation questions

What percentage of participants who attended three or more sessions reported self-management actions?
What was different between those who did and those who did not?

Urban Indian Health Institute, a Division of the Seattle Indian Health Board

21

Indicators

The evidence we can see, hear or read to demonstrate the outcome.

Urban Indian Health Institute, a Division of the Seattle Indian Health Board

22

Indicators

Part of the logic model	Inputs	Outputs: Activities	Outputs: Participants	Outcomes: Short term	Outcomes: Medium term	Outcomes: Long term
Type of Evaluation	Implementation or process evaluation			Outcomes Evaluation		
Types of questions	What type and amount of resources were invested?	•How many sessions were held? •How were they implemented?	•Who/how many people attended? •Did they attend all sessions? •Were they satisfied? Why and Why not?	•To what extent did knowledge increase? •To what extent did skills increase? •For whom? Why and Why not?	•To what extent did behaviors change? •For whom? Why and why not?	•To what extent did depressive symptoms change? •For whom? Why and why not?
Indicators	•Money used •Number of staff	Number of sessions held	•Attendance logs •Satisfaction surveys	Number or percent demonstrating knowledge or skills increases	Number or percent demonstrating or reporting behaviors	•Number of percent demonstrating or reporting improvements. •Types of improvements

Urban Indian Health Institute, a Division of the Seattle Indian Health Board

23

Summary

Who Needs to know	What Information is necessary
Theory & Age Of the program	Can we reasonably collect the data

Urban Indian Health Institute, a Division of the Seattle Indian Health Board

24

Summary

```

graph TD
    A[What we ask] --> B[Indicators examined]
    C[How we ask] --> B
    B --> D[Information we receive]
    D --> E[Planning & Action]
    C --> F[How data is collected]
    F --> D
  
```
