Research Roundtable on the MCH Well Visit Planner

The Maternal and Child Health Bureau Research Program will review the online Well Visit Planner parent tool as a model for customizing care and improving quality and outcomes. Issues in design, testing and implementation for this and similar tools will provide direction for evolving the still nascent field of patient engagement in improving child health care and outcomes.

Resource

The Child Welfare Information Gateway through the HHS Administration for Children and Families created a resource guide for national Child Abuse Prevention Month. This guide, Preventing Child Maltreatment and Promoting Well-Being: A Network for Action 2013 Resource Guide, supports service providers in their work with parents, caregivers and their children to strengthen families and prevent child abuse and neglect. The guide focuses on the six protective factors, which have been proven to reduce the risk of abuse and neglect, and provides tools and strategies to integrate the protective factors into existing programs and systems.
