Funding Opportunity

Kaiser Permanente Community Based HIV Test and Treat Initiative

This Community Based HIV Test and Treat Initiative is part of Kaiser Permanente’s continuing effort to improve the health and well-being of racial and ethnic minorities, and to eliminate racial and ethnic disparities in health care and health outcomes, specifically related to HIV disease. The purpose of this program is to improve early identification of new HIV cases and to increase the HIV care acquisition and maintenance of newly diagnosed individuals in minority communities disproportionately affected by the HIV epidemic.
Award Amount: $125,000 per year for two years
Application Deadline: May 17, 2013

More information about the Kaiser Permanente Community Based HIV Test and Treat Initiative can be found online.

Training

Preventing Teen Pregnancy Among Native American Youth Webinar

May 2013 is Teen Pregnancy Prevention Awareness Month. This Native American Youth Webinar will present an overview of the status of teen pregnancy among Native American youth and will showcase how the Zuni Youth Enrichment Project, the Great Plains Tribal Chairman’s Health Board and Rural America Initiative are working to prevent teen pregnancy with Native American youth.

May 9, 2013 2:00 p.m. (Eastern Time)

More information about the Preventing Teen Pregnancy Among Native American Youth Webinar can be found online.

CDC Self-directed and STD-focused SAS Instruction Training Modules

The CDC Self-directed and STD-focused SAS Instruction (SASSI) Training Modules are designed to teach skills in data management and analysis using SAS. The training aims to enable interested STD program staff to effectively manage and analyze data using SAS. Local management and analysis of STD case surveillance data and related information allows for ongoing evaluation of program efforts, timely response to changes in trends and evidence-based decision making.

More information about the CDC Self-directed and STD-focused SAS Instruction Training Modules can be found online. The training is self-directed and can be completed at any time.

Research to Reality Cyber-Seminar Series: Health Rankings and Assessment

Having an understanding of the health of your community in relation to other communities/states can be an important factor in health planning and programming. The National Cancer Institute (NCI) will explore two resources that are designed to help users assess the health of their communities using a variety of data sources, and then to use that data to create solutions and implement programs for a healthier community.

Health Rankings and Assessment: Tools of the Trade
May 21, 2013 2:00 p.m. - 3:00 p.m.

More information about the Research to Reality Cyber-Seminar Series: Health Rankings and Assessment can be found online.
CDC Sortable Risk Factors and Health Indicators

Sortable Stats is an interactive data set comprised of behavioral risk factor and health indicators that can be stratified by race. This data set compiles state level data from various published CDC and federal sources into a format that allows users to view, sort and analyze data at state, regional and national levels. This tool serves as a resource that can be mobilized for grant writing and health advocacy.

More information about CDC Sortable Stats can be found online.
