

PrEP, the Daily Pill to Prevent HIV

Taking PrEP can help prevent HIV transmission if you are HIV-negative and vulnerable to getting HIV. Talk with your healthcare provider about PrEP today.

PrEP is a daily pill that can reduce the risk of contracting HIV by more than 74% for shared needles.

PrEP is a daily pill that can reduce the risk of contracting HIV by more than 99% for sex.

PrEP is approved for people 15 years of age and older.

You must be HIV-negative to take PrEP.

PrEP is for all genders and sexes.

Consider PrEP if:

- You have had anal or vaginal sex in the past 6 months and
 - have a sexual partner with HIV.
 - have not consistently used a condom.
 - have been diagnosed with an STD in the past 6 months.
- You inject drugs and
 - have an injection partner with HIV.
 - share needles, syringes, or other equipment to inject drugs.

To further reduce vulnerability:

- Combine PrEP with condoms, dental dams, and other prevention options.
