

Be a Good Relative

Camie (Sisseton-Wahpeton), vaccinated December 2020

Keep Our Communities Healthy

Getting the vaccine is a choice, but there may be risks to choosing not to be vaccinated. Elders and those with weaker immune systems may continue to be in danger of infection and the disease could last longer across the country.

The COVID-19 vaccines have been thoroughly tested and received emergency authorization by the FDA. Talk with your provider to see if the COVID-19 vaccine is right for you.
